

Table 1 Association between constructs of research (Pearson correlation)

	Perception of benefits	Perception of risks	Trust to individual and agencies	Ethical concerns	Attitudes	Behavioral intention
Perception of benefits	1					
Perception of risks	0.13	1				
Trust to individual and agencies	0.32**	0.02	1			
Ethical concerns	-0.10	0.41**	-0.01	1		
Attitudes	0.43**	0.11	0.46**	-0.04	1	
Behavioral intention	0.44**	-0.06	0.37**	0.03	0.49**	1

Note: ** $P \leq 0.01$, As shown in Table 1, there are significant and positive correlation between “perception of benefits” ($r = 0.44$, $P < 0.01\%$), “trust to individual and agencies” ($r = 0.37$, $P < 0.01\%$), “attitudes” ($r = 0.49$, $P < 0.01\%$) with “behavioral intention”
